PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Machine Learning with hands-on experience building full-stack web applications using Python, Flask, FastAPI, and SQL. Skilled in REST API development, relational database design (SQLite), and applying Scikit-learn based machine learning models to real-world problems in health, fitness, and campus management. Comfortable across the stack, from HTML/CSS/JavaScript frontends to backend logic and data persistence, with strong version control practice using Git and GitHub. Seeking a Fresher role as a Python Full Stack Developer / AI-ML Engineer to build scalable, data-driven applications.

TECHNICAL SKILLS

Programming Languages: | Python

Backend & Web Development: | Flask, FastAPI, REST APIs, HTML, CSS, JavaScript

Databases: | SQLite, SQL (Joins, Queries, Schema Design)

Machine Learning: | Scikit-learn, Data Preprocessing, Model Evaluation, ML Fundamentals

Tools & Platforms: | Git, GitHub, VS Code

Core Concepts: | Object-Oriented Programming, Data Structures & Algorithms, API Integration

Soft Skills: Team Management, Problem Solving, Communication, Time Management

KEY PROJECTS

AI Diet Plan Recommendation System | Flask, Python, HTML/CSS, LLM API, REST APIs

Personalized Health & Nutrition Web Application | GitHub Repository

- Built a full-stack web application that generates personalized diet plans by processing user inputs (age, weight, height, fitness goals) through a Flask backend.
- Integrated a large language model API via REST calls to deliver dynamic, context-aware meal and nutrition recommendations.
- Designed the HTML/CSS/JavaScript frontend to communicate with Flask endpoints, handling form validation and real-time response rendering.

AI Fitness Tracking System | Flask, Python, HTML/CSS, SQLite

Full-Stack Workout & Nutrition Analytics Platform

- Developed a fitness tracking application that logs daily workouts, calories burned, and active minutes, storing structured user data in SQLite.
- Implemented rule-based logic to generate personalized fitness recommendations from historical workout and health data.
- Connected a responsive HTML/CSS/JavaScript frontend to a Flask REST backend, enabling real-time display of fitness insights and progress trends.

PROFESSIONAL CERTIFICATIONS

- Python for Beginners — Infosys Springboard
- Foundations of Modern Machine Learning — IIIT Hyderabad (via iHub Data)
- Python Full Stack Certification — EduSkills Academy
- AI Careers for Women — Microsoft, SAP & Edunet Foundation

ACHIEVEMENTS & TECHNICAL EXPOSURE

- Maintain public GitHub repositories with clear README documentation, modular codebases, and consistent coding standards across all listed projects.
- Actively strengthening Data Structures & Algorithms and backend integration skills through consistent problem-solving practice.
- Participated in technical ideation bootcamps and hackathons, collaborating in teams to prototype cross-functional software solutions under competitive timelines.

EDUCATION

Kakinada Institute of Engineering and Technology for Women | Kakinada, India

Bachelor of Technology (B.Tech) in Artificial Intelligence & Machine Learning | 2023 – 2027 | CGPA: 8.21
